SUB ROSA[®] PRO

A THURSBY BROWSER APP

Sub Rosa Pro allows you to use your phone or tablet to access two-factor enabled websites like AKO, NROWS, and SharePoint sites. This FIPS 140-2 mobile browser makes reading your email a pleasant experience. Sub Rosa Pro reformats Outlook Web Access (OWA) so that you have the look and feel of a native email client while still getting the power and speed of linking directly to the OWA mail servers. Signing, encrypting, and decrypting your email on a mobile device has never been so easy or convenient. Sub Rosa Pro also includes full access to your Outlook calendar so that you can view, edit, and respond to events on your mobile device. Visit www.thursby.com to learn more.

Highlights

- Includes support for derived credentials (Purebred enabled)
- Sign, encrypt, and decrypt email in a user-friendly format
- View, edit, and respond to calendar events
- Ability to enforce Zero Data-At-Rest (DAR) so that no user data or documents can be saved on the device or delivered to other applications
- Automatically locks after a period of inactivity
- FIPS 140-2 certified browser specially designed for government use
- Part of a secure Android app ecosystem leveraging the PKard Toolkit
- Custom app development available to create a secure, tailored experience
- Available at www.thursby.com or in the Google Play store

Hardware

- For CAC/PIV, a card reader that appears as a CCID device is required
- Visit www.thursby.com to purchase compatible micro-USB card readers
- Available on most Android devices running 6.0 and higher

4901 South Collins St | Arlington, TX 76018 | USA | +1(817) 478-5070
